PERSONAL SUMMARY

Former Senior Information Security Engineer with 8 years of experience in Cybersecurity – that made me competent in security incident investigation, protecting a company's network from cyberattacks and identifying fraudulent activities online. Passionate about merging cybersecurity expertise with creative flair in web design and development. I am a dynamic candidate ready to integrate security measures with innovative design solutions. Eager to leverage my analytical and problem-solving skills to contribute to dynamic projects, combining security measures with innovative design solutions. Proven ability to navigate the intricate landscape of cybersecurity seamlessly intertwined with a keen eye for aesthetic details, making me a versatile candidate poised to elevate web design endeavors.

CORE COMPETENCIES

- Web Design and Development
- Code debugging/troubleshooting
- Adobe Creative Cloud apps: Illustrator, Photoshop
- UI/UX design
- Computer forensics

TECHNICAL SKILLS

- Programming languages: Javascript, HTML, & CSS with Bootstrap framework integration
- IDE: Visual Studio Code

WORK HISTORY

MAYA PHILIPPINES, INC.

Sr. Information Security Engineer | December 2020 - August 2023

- Analyzed security breaches to identify the root cause of the event
- Monitored network traffic to detect potential threats and then responding to these threats promptly
- Performed computer forensics that create evidence in the event of a breach like collection, analysis, and reporting of data
- Managed the negative effects of an attack or breach, from minimizing the impact to altering security controls for future prevention

ACCENTURE

Security Analyst | January 2020 - November 2020

- Performed security incident investigations, determining the cause of the security incident and appropriately preserving evidence for potential legal action
- Made recommendations on the appropriate corrective action for incidents, assess artifacts and close incident vulnerability as appropriate – preserve technical evidence as appropriate
- Produced security incident reports and briefings and distribute to appropriate parties
- Analyzed potential infrastructure security incidents to determine if incident qualifies as a legitimate security breach

IT Operations Analyst | April 2019 - December 2019

- Reviewed solutions, recommendations, and risk documentations to minimize risk of implementation of recommended products, applications, and infrastructure
- Worked with Risk Management and Audit Organizations to identify, document and resolve corporate risks, understand client requirements, create security reports and maintain process documentation
- Performed scheduled security remediation activities on the following platforms: Linux WAF, Fortigate and Fortiweb – from a Qualys Scan audit to minimize risk of reported vulnerable devices from being attacked
- Managed renewing SSL certificates on pfSense environment

TREND MICRO INC.

Cloud Security Engineer | October 2015 - April 2019

- Provided technical support to Home & Home Office users
- Provided support and awareness for every device against cyber-attacks, network intrusions, web threats and identity theft of Home Network Security users that are connected to the internet
- Troubleshooted and performed installation, malware removal on end user's machine
- Key roles and immersion programs: Home Network Security Virtual POC, Content Specialist

ACADEMIC HISTORY

HUMBER COLLEGE CANADA

Certificate of Achievement in Web Design and Development Program | September 2023 - Present

ST. PAUL UNIVERSITY QUEZON CITY PHILIPPINES

Bachelor of Science in Information Technology | 2011 - 2015

MARIKINA CATHOLIC SCHOOL PHILIPPINES

Secondary School | 2007 - 2011
