WORK HISTORY

MAYA PHILIPPINES, INC.

Sr. Information Security Engineer | December 2020 - August 2023

- Analyzing security breaches to identify the root cause of the event
- Monitoring network traffic to detect potential threats and then responding to these threats promptly
- Performs computer forensics that create evidence in the event of a breach like collection, analysis, and reporting of data

ACCENTURE

Security Analyst | January 2020 - November 2020

- Perform security incident investigations, determining the cause of the security incident and appropriately preserving evidence for potential legal action
- Make recommendations on the appropriate corrective action for incidents, assess artifacts and close incident vulnerability as appropriate – preserve technical evidence as appropriate
- Produce security incident reports and briefings and distribute to appropriate parties

IT Operations Analyst | April 2019 - December 2019

- Review solutions, recommendations, and risk documentations to minimize risk of implementation of recommended products, applications, and infrastructure
- Work with Risk Management and Audit Organizations to identify, document and resolve corporate risks, understand client requirements, create security reports and maintain process documentation
- Perform scheduled security remediation activities on the following platforms: Linux WAF, Fortigate and Fortiweb – from a Qualys Scan audit to minimize risk of reported devices from being attacked

TREND MICRO INC.

Cloud Security Engineer | October 2015 - April 2019

- Provides technical support to Home & Home Office users
- Provides support and awareness for every device against cyber-attacks, network intrusions, web threats and identity theft of Home Network Security users that are connected to the internet
- Troubleshooting and perform installation, malware removal and different technical services offered
